THE FUNCTIONS, ORGANIZATION, AND EQUIPMENT

OF THE

CORPS HEADQUARTERS AND HEADQUARTERS COMPANY

MISSION: Prepare Report and Recommendations on the Functions, Organization and Equipment of Corps Headquarters and Headquarters Company.

The General Board was established by General Order Number 128, Headquarters European Theater of Operations, U.S. Army, dated 17 June 1945, as amended by General Order Number 182, dated 7 August 1945 and General Order Number 312, dated 20 November 1945, Headquarters United States Forces, European Theater, to prepare a factual analysis of the strategy, tactics, and administration employed by the United States forces in the European Theater.

REPORT ON THE FUNCTIONS, ORGANIZATION, AND EQUIPMENT OF THE
CORPS HEADQUARTERS AND HEADQUARTERS COMPANY

Prepared by:

Brigadier General A. F. Kibler, 06668, Assistant Chief of
Staff, G-3.

Colonel Bjarne Furuholmen, 015725, G-3 Section.

Colonel R. Warren Davis, 020128, G-3 Section.

Lieutenant Colonel William S. McCrea, 020884, G-3 Section.

Source material contributed by the General and Special Staff Sections
of the General Board, based upon reports and recommendations of the
Armies and Corps which participated in the European Campaign.

APPENDICES: 1-15, inclusive - Charts, as indicated above, showing proposed functional organization of the respective Headquarters staff sections and the Corps Headquarters Company.		

REPORT ON THE FUNCTIONS, ORGANIZATION, AND EQUIPMENT OF THE
CORPS HEADQUARTERS AND HEADQUARTERS COMPANY

SECTION 1

DISCUSSION

1. Introduction. The duration of the campaign in the European Theater and the variety of problems encountered there, both in friendly and hostile territory, furnished experience embracing virtually every type of operating condition. In addition to providing an excellent field test for tactical doctrine and equipment, the campaign also emphasized the adequacy or weakness of previously conceived staff organizations when required to function 24 hours a day for extended periods. On the basis of this experience, the general and special staff sections of the General Board, with few exceptions, have prepared individual studies which examine in detail the functions, organization, and equipment of corresponding staff sections in the various command levels of the American forces which participated in the campaign. It is the purpose of this paper to summarize briefly the findings of those studies as they apply to the Corps Headquarters and Headquarters Company.

2. Form of the Paper. In the interests of clarity and brevity, this paper has omitted a detailed discussion of:

a. Staff sections for which the authorized Tables of Organization and Equipment proved adequate. Specifically, these are the G-4, Artillery, Chemical Warfare, Finance, Ordnance, and Quartermaster sections. In this regard, possible new sections have been considered but, where deemed inappropriate or unessential, have been disregarded in the text. As an example, a separate Transportation Section was considered, but subsequently discarded in favor of the presently authorized subsection within the G-4 organization.

b. Functional duties which were performed in accordance with the provisions of Field Manual 101-5. The functions defined in Field Manual 101-5 were found generally to be appropriate and properly assigned to the respective staff sections, but experience has suggested the desirability of indicating a few additional functions, such as those pertaining to G-5 activities.

3. Appended Material. Charts showing a possible functional organization and the recommended personnel changes are included as appendices to this study. Proposed personnel increases, indicated on the charts by asterisks, are in addition to those grades and ratings set forth in Table of Organization and Equipment 100-1 (with the augmentation authorized Theater Commanders), dated 19 January 1945. It has not been feasible to indicate personnel changes in the discussion of individual general staff sections since the Table of Organization shows only a bulk allotment of personnel for general staff activities.

4. Chief of Staff and Deputy Chief of Staff. Assignment of enlisted personnel to the offices of the Chief of Staff and Deputy Chief of Staff is made from the General Staff personnel allotment. This system has the advantage of facilitating minor adjustments to suit the varying needs of each corps, and it should be retained. The responsibilities of this "coordinating personnel" prescribed in Field Manual 101-5 are considered appropriate, but it is recommended that an additional function be the direct supervision of a Public Relations sub-section, which the Board recommends be included as part of the augmentation to Table of Organization and Equipment 100-1, 19 January 1945. The present assignment of public relations responsibilities to the G-2 Section is considered inadvisable. The preparation of both historical and public relations material encompasses the activities of all staff sections to such a degree that responsibility for these matters should be vested in the coordinating agency of the headquarters rather than in a specific staff section. The functions of public relations and historical personnel need no elaboration, and the necessity for their provision is evident. The organization, as shown in Appendix 1, is recommended therefore to provide organic personnel for this work when prescribed by the Theater Commander. However, responsibility for psychological warfare and counter-propaganda matters should remain with G-2.

5. G-1 Section. a. The number of enlisted personnel normally allotted to the G-1 Section from the General Staff authorization usually was insufficient to permit maximum efficiency during periods of 24-hour-a-day operation. Six enlisted men, with grades and specialties as shown in Appendix 2, are recommended as a minimum. Assignment of this number necessitates the addition of two enlisted men to the General Staff allotment.

b. Equipment as authorized is considered adequate.

c. Functions prescribed by Field Manual 101-5 are considered appropriate except for those duties which are now a responsibility of the G-5 Section. See paragraph 9.

6. G-2 Section. a. The addition of a lieutenant colonel as G-2 Air and of a captain in the operations sub-section is recommended as shown in Appendix 3. The increasing importance of careful planning and coordination in matters involving Air Force tactical reconnaissance and the desirability for having this work handled by an integral member of the G-2 Section make apparent the need for a G-2 Air. Continuous operation requires the addition of one officer to the operations sub-section. Eight enlisted men, including two stenographers and two draftsmen, also are required. This necessitates the addition of three enlisted grades to the General Staff allotment.

b. Equipment as authorized is considered adequate.

c. Functions as prescribed in Field Manual 101-5 are considered appropriate, with the exception of the responsibility for public relations. The Board recommends that G-2 be relieved of this function and that the work and responsibility be allotted as described in paragraph 4, above. The attachment of numerous specialist teams for such purposes as Prisoner Interrogation, Military Intelligence, Order of Battle, and Counter-Intelligence was a satisfactory procedure and should be continued.

7. G-3 Section. a. An additional lieutenant colonel as Assistant G-3 and executive officer is recommended in order to assure 24-

hour-a-day supervision of the section by an officer who is familiar with the operations and developments in all G-3 sub-sections. Continuous operation also demands the comparatively large number of enlisted men (18) indicated in Appendix 4, which calls for the addition of five men to the General Staff allotment. A detailed development of the functions and requirements of this section will be found in the General Board Study Number 25, "Organization, Functions and Operations of G-3 Sections in Theater Headquarters, Army Groups, Armies and Corps", file 320.2/48.

b. Appropriate office equipment to provide for the additional officer and enlisted personnel is recommended.

c. Functions prescribed by Field Manual 101-5 are considered appropriate, but it is believed that coordination with the Air Forces for training and combat operations should be mentioned as a G-3 function rather than that of a special staff section for air. Also, information and education activities, now listed as a responsibility of the special services officer, should be transferred to G-3.

8. G-4 Section. No changes are recommended.

9. G-5 Section. a. The organization of the G-5 Section must be determined largely on the basis of the task to be accomplished, a factor which cannot be predicted in peacetime. It is recommended, however, that the organization outlined in Appendix 5 be included in the augmentation to Table of Organization and Equipment 100-1, 19 January 1945. Detailed consideration of G-5 problems and functions is included in General Board Study Number 32, "Civil Affairs and Military Government Organizations and Operations," file 321/3.

b. Equipment for this section should include one $1\frac{1}{2}$ -ton truck two $\frac{1}{2}$ -ton trucks and appropriate office equipment.

c. Functions of the G-5 Section may include supervision of any or all of the following matters and should be so designated in appropriate War Department publications:

- (1) Internal Affairs.
- (2) Economics.
- (3) Displaced Persons, Refugees, and Welfare.
- (4) Legal.
- (5) Finance.
- (6) Reparations, Restitutions and Deliveries.

10. Engineer Section. General Board Study Number 71, "Engineer Organizations", file 320.2/36, recommends the establishment of a Corps Engineer Command to replace the Engineer Section of the Corps Headquarters. The proposed Engineer Command consists of the headquarters organization, as shown in Appendix 6, and an Engineer Headquarters Company of one officer and 21 enlisted men. The change is considered to offer more efficient coordination of engineer effort in the Corps area. A detailed discussion of the need for this organization and of its proposed functions is included in the study mentioned above.

11. Signal Section. a. It is recommended that the Corps Wire Officer be a major rather than a captain in order to provide the rank commensurate with his responsibilities and to establish a satisfactory channel of promotion within the section. Excellent results have been obtained by using the captain (supply) from the corps signal battalion to serve also as corps signal supply officer, and it is recommended that this officer and his clerk continue to serve in dual capacity. Appendix 7 also includes three additional enlisted men - a stenographer for the signal officer and executive, a technician fourth grade as a relief for the radio clerk and a clerk, general, to serve as messenger, typist and duplicating machine operator. It is recommended that the administrative clerk and the cryptographic technician be downgraded from master sergeant to technical sergeant. Experience has indicated that the chief clerk (master sergeant) should be the senior noncommissioned officer.

b. Equipment as authorized is considered adequate.

c. Functions prescribed by Field Manual 101-5 are considered appropriate.

12. Chemical Section. No changes are recommended.

13. Field Artillery Section. No changes are recommended insofar as the Corps Headquarters is concerned. However, recommendations as to personnel, equipment and functions of Corps Artillery may be found in General Board Study Number 59, "Organization and Equipment of Field Artillery Units", file 320.2/8.

14. Adjutant General's Section. a. Combat experience indicated the need for additional personnel in the Adjutant General's Section to permit proper handling of battle casualty reports and the rapid processing of awards and decorations. Personnel for these two sections should include one officer, two warrant officers and ten enlisted men as shown in Appendix 8. A Corps Postal Officer was found to be necessary to supervise Army Postal Units within the corps; the grade of captain is suggested for the position. Other minor shifts of personnel to provide equitable distribution of clerical skill are recommended as shown in Appendix 8. All added personnel should be included in the augmentation to Table of Organization and Equipment 100-1. A more comprehensive development of the functions and requirements of Adjutant Generals' Sections will be found in General Board Study Number 47, "The Adjutant General in a Theater of Operations", file 320.2/40.

b. It is recommended that the provisions of Table of Organization and Equipment 100-1 for this section be amended to include one electric mimeograph, one addressograph and five additional standard typewriters.

c. Functions prescribed in Field Manual 101-5 are considered appropriate.

15. Inspector General's Section. a. The need for competent noncommissioned personnel to assist the Inspector General in his investigations makes it desirable that one technical sergeant and one staff sergeant be added to the section. The recommended organization of the section is shown in Appendix 9. A more comprehensive development of the functions and requirements of Inspector General's Sections will be found in the General Board Studies Number 78 and 79 respectively, "Administrative Operations of Inspectors General in the Theater", file 333/1, and "Functional Operations of Inspectors General in Ground

Force Units", file 333/2.

b. Authorized equipment should include one portable and three standard typewriters.

c. Functions prescribed by Field Manual 101-5 are considered appropriate.

16. Judge Advocate General's Section. a. Augmentation of the Judge Advocate General's Section by two captains is recommended in order to provide trained personnel for details as law members, trial judge advocate and defense counsel. A warrant officer to handle administrative functions and a court reporter and two stenographers also are included in the recommended organization shown in Appendix 10. A change in functions of enlisted men is proposed in order to make the court reporter available for trial work and the two stenographers available for section work and emergency court reporting. A more comprehensive development of the functions and needs of Judge Advocate Generals' Sections will be found in General Board Study Number 82, "The Judge Advocate Section in the Theater of Operations", file 320.2/7.

b. Additional transportation and office equipment commensurate with the increase in personnel is recommended.

c. Functions as prescribed in Field Manual 101-5 are considered appropriate.

17. Finance Section. No changes are recommended. A detailed development of the functions and requirements of Finance Sections will be found in the General Board Study Number 75, "Activities of the Finance Department in the European Theater of Operations", file 321/13.

18. Medical Section. a. Recommended additions to this section include a Corps Sanitary Officer, a Corps Dental Surgeon and a Corps Veterinary Officer. The size and variety of units which form a corps are such that there is an appreciable demand for over-all supervision in the field of sanitary engineering. The large number of corps troops which have no dental personnel makes it desirable that a Corps Dental Surgeon be included to organize and consolidate dental facilities to assure adequate care for all personnel. The elimination of the Division Veterinary Officer makes it desirable that there be a Corps Veterinarian to inspect ration items of animal origin and rations which are procured from local sources. Another recommended change as shown in Appendix 11 is the substitution of a technician fifth grade, draftsman, for the present clerk-typist, to facilitate the production of casualty charts and diagrams. A detailed discussion of the subject will be found in General Board Study Number 89, "Organization and Equipment of Medical Units", file 320.2/10.

b. Equipment as authorized is considered adequate.

c. Functions as prescribed by Field Manual 101-5 are considered appropriate.

19. Ordnance Section. No changes are recommended.

20. Quartermaster Section. No changes are recommended.

21. Special Services Section. a. Experience has indicated that the present Corps Special Service Section is too small to provide the many forms of recreation demanded. The need for athletics, entertainment and rest camps indicates that the additional personnel shown on

Appendix 12 should be included in the augmentation to Table of Organization and Equipment 100-1. A detailed report on the functions and organization of Special Services Sections in the various echelons is contained in General Board Study Number 113, "Special Services Organizations," file 321/6.

b. Transportation and office equipment commensurate with the increase in personnel should be authorized.

c. Functions as prescribed in Field Manual 101-5 are considered appropriate, except those which pertain to information and education activities.

22. Chaplain's Section. a. It is recommended that a Jewish chaplain and an additional chaplain's assistant be added to the present section to coordinate services for Jewish personnel within the corps command. Also, it is recommended that the presently authorized warrant officer be replaced by a master sergeant in order to achieve better organizational balance. Additional material on the functions and requirements of Chaplain's Sections will be found in General Board Study Number 68, "The Army Chaplain in the European Theater of Operations," file 322.01/4.

b. Authorized equipment should be augmented by the addition of one chaplain's outfit, complete, and one $\frac{1}{2}$ -ton truck with trailer.

c. In addition to those functions prescribed in paragraph 5, AR 60-5, certain additional responsibilities were found to be incumbent upon Corps Chaplain's Sections in this theater. It is recommended that appropriate War Department publications be amended to provide specifically for these additional functions, namely:

- (1) Conduct and provision of burial rites.
- (2) Spiritual ministrations to prisoners.
- (3) Recommendations as to training, promotions and replacement of chaplains and of their enlisted assistants.
- (4) Coordination with the Special Services Officer on the spiritual and morale aspects of morale activities.
- (5) Counsellor in personal, morale and religious problems.
- (6) Coordination of religious ministrations to displaced persons, prisoners of war and civilian internees.
- (7) Liaison with civilian religious agencies and with chaplains of allied nations' forces.
- (8) Stockage and distribution of expendable religious supplies.

23. Armored Section. The General Board is of the opinion that the Armored Section is required only in Theater Headquarters.

24. Provost Marshal's Section. a. An augmented Provost Marshal Section is considered necessary to permit efficient handling of criminal investigation matters and the collection, guarding and detention of

prisoners of war, civilian refugees, and displaced persons. The proposed organization of the section is illustrated at Appendix 14.

b. Transportation and office equipment should be authorized, commensurate with the personnel increase.

c. Functions in addition to those listed in Field Manual 101-5 which were performed by the Provost Marshal and which are considered proper for inclusion therein were:

- (1) Initiation and execution of policies, plans and procedures for road traffic control.
- (2) Care and evacuation of military personnel who have been recovered from the enemy or have escaped or evaded capture by the enemy.
- (3) Retention and evacuation of war criminals and civilian suspects.
- (4) Custody and administration of military prisoners.
(covered in Field Manual 100-10)
- (5) Security of property, premises and utilities.
(covered in Field Manual 100-10)

25. Corps Headquarters Company. a. Substantial augmentation of Corps Headquarters Company was found necessary by all Corps which engaged in extensive combat operations. These needs were largely satisfied by increases authorized in War Department letter to the Commanding General, United States Forces in the European Theater, file AG 322 (20 Mar 45) QB-1-GMGCT-M, dated 26 March 1945, subject: "Activation, Reorganization and Augmentation of Divisional, Corps and Army Units". A suggested revision of Table of Organization 100-2, adding three new sections to the Corps Headquarters Company is indicated in Appendix 15. Detailed justification for each of the changes is given below. Parenthetical letters refer to changes on the chart marked with a like symbol:

(a) A lieutenant mess officer is required at the rear echelon as well as at the forward echelon. Three messes (general officers', officers' and enlisted men's) are operated at the forward echelon and two messes (officers' and enlisted men's) at the rear echelon.

(b) Required in the rear echelon to perform duties of company commander and supply officer.

(c) Chief of utilities section comprising the electricians, carpenters and painters. Supervises all work including repairs, installation of lighting, heating, water systems and other utilities.

(d) To function as first sergeant of rear echelon.

(e) Table of Organization and Equipment 100-2 makes no provision for electric lighting of the Corps headquarters during operations. Three electricians should be included to install, maintain and operate this equipment. Experience has proved that a Corps headquarters needs the following: At the forward echelon 1 15-KW and 3 5-KW light plants. At the rear echelon 1 15-KW and 2 5-KW plants.

(f) Required for command post movement and installation details and as waiters for the three officers' messes.

(g) Three barbers are the minimum required for the forward and rear echelons. None is included in the present organization.

(h) Only one staff sergeant, duty, is necessary if personnel sub-section is authorized.

(i) The headquarters is authorized ten vehicles without drivers and four additional vehicles recommended herein; thus fourteen additional drivers are required. The Table of Organization and Equipment states that these vehicles will be driven by mechanics and section personnel. This procedure was found impractical from both personnel and maintenance standpoints.

(j) Experience has proved that 19 cooks and 13 cook's helpers are the minimum requirement for the proper operation of five messes.

(k) Three dispatchers are required because the motor pool operates on a 24-hour basis.

(l) Two painters are needed during combat to keep the headquarters, headquarters company and military police supplied with signs. Duties also include painting staff section property, equipment and packing cases.

(m) A Military police platoon sergeant is required at both the forward and rear echelons.

(n) A 24-hour guard is posted at both the forward and rear echelons; two additional sergeants are required for this important function.

(o) A clerk is needed to type the many police reports, keep personnel records and perform necessary administrative details required by regulations.

(p) Four additional corporals are needed for guard duty at the rear echelon. The four already authorized are required at the forward echelon.

(q) A total of 34 military policemen are needed at the forward echelon to provide adequate security and maintain traffic discipline in the corps command post area. Four military police were used for the escort of the Commanding General and Chief of Staff, four as security guard for G-3 operations and 27 on interior guard and traffic posts. Thirty additional privates or privates first class are needed for duty at the rear echelon.

(r) The Headquarters Commandant should have a separate staff section and should be an officer of broad experience, capable of making decisions and of assuring the security of the headquarters. The responsibilities of the office are commensurate with those of other lieutenant colonels. The enlisted men included in the Headquarters Commandant section are required for administration purposes.

b. Additional major items of equipment recommended for inclusion in Tables of Organization and Equipment 100-2 are:

Four 2 $\frac{1}{2}$ -ton trucks (to permit assignment of five to each echelon)

One 3/4-truck (for Military Police use in posting guards, hauling stragglers and prisoners)

Two .30 calibre light machine guns (for Corps reconnaissance parties)

Six .45 calibre submachine guns (for Corps reconnaissance parties)

Four 3-unit field ranges (for the five messes)

Six immersion heaters

One chest, Medical Department #2) for dispensary at
One blanket set, small) forward echelon

SECTION 2

CONCLUSIONS AND RECOMMENDATIONS

26. It is Concluded:

That, with the exception of those staff sections for which major reorganization is being recommended by the General Board, the personnel and equipment changes reviewed in the foregoing discussion are predicated in general upon purely wartime exigencies and are not likely to be required under occupational or peacetime conditions. The majority of the proposed increases, therefore, may well be placed in the augmentation to Table of Organization and Equipment 100-1 and 100-2, respectively, for authorization to Theater Commanders when the need for such increases should arise.

27. It is Recommended:

a. That the functions, organization, and equipment of the Corps Headquarters be revised in accordance with the proposals summarized in this study and discussed in detail in the other General-Board reports referred to herein.

b. That the proposed strength and organization of the Corps Headquarters Company, as indicated in Appendix 16, be used as the bases for the revision of Table of Organization and Equipment 100-2, dated 19 January 1945.
